

# ProKitchen

Professional Kitchen & Bath Software

Compatible with

## ProKitchen Software

Join thousands of designers, architects, home builders and remodelers who rely on the pioneering technology of ProKitchen Software.

ProKitchen is the only professional kitchen and bath design software that runs on native Mac and Windows devices, providing astonishing photo-realistic 3D renderings and access to hundreds of manufacturers catalogs, ensuring accurate pricing quotes.

This state-of-the-art kitchen and bath software offers the ability to improve the customer experience with amazing iPhone, iPad, and Android solutions, as well as point stylus features.

## We recognized the challenge...

Kitchen and bathroom design can be costly and complicated without the right tools. Your customers want to be able to visualize their space in a realistic way before making a big investment, and in today's world, drawings and blueprints just won't cut it. You need a design software that can give your customers the high-quality design they want, while giving you the simple, intuitive design tools you need.

## ...and are bringing you the solution.

ProKitchen Software delivers an unparalleled level of realism. Every color, pattern and finish appears true-to-life, allowing your customer to feel as though they're walking through the design, experiencing each and every detail. Your customer will be able to choose from hundreds of manufacturer catalogs, designing their kitchen or bath to be a perfect fit. ProKitchen's distinctive products provide opportunities for increased sales and revenue as well as a higher level of productivity for kitchen and bathroom dealers, designers, architects, and builders.

Advanced Technology and cutting-edge software developments set ProKitchen apart from other K&B software solutions. The strength of ProKitchen lies not only in the inventiveness of the product, but in its Java technology foundation, leading to stability with no lockups. Our software boasts a versatile, flexible countertop module, a closet designer and direct-to-manufacturer electronic ordering.

## Why Choose ProKitchen?

### Easy-to-use Interface

We understand that you're a designer, not a software engineer. ProKitchen is easy to learn and was created with the designer in mind. We're giving you all the tools you need to create, share and price a beautiful and accurate design, without complicating things.

### Hundreds of Manufacturer Catalogs

Give your client the freedom to choose from hundreds of cabinet and appliance manufacturers, from major brand names to boutique suppliers.

### Photo-realistic Renderings

Sell your clients on your design with renderings that let them truly experience it. Every color, pattern and finish appear true to life, and each rendering can be viewed as a fully rotational, 360 degree panorama.

### Advanced Sharing Capabilities

Sharing your designs with clients is as easy as sending an email. Designers also have the ability to send fully rotational, 3D designs to clients' smartphones and tablets via the ProKitchen's iProK3D App.

# Take your designs wherever the world takes you

## Introducing ProKitchen Online

ProKitchenOnline is a web-based software solution that gives you access to the entire scope of ProKitchen Software, without being tied down to a hardware key.

ProKitchen Online will revolutionize the way you design by transforming any computer into your personal workspace at the click of a button. It's the same high-quality design software you know and love, redeveloped to fit your fast-paced, ever-changing work environment.

## ProKitchen Panorama

### Additional features:

Fast and robust panoramic views on both Mac and PC. Take your panoramas with you on your smartphone or tablet. Easy to share—just email your client a panoramic view link and they can view it in their web browser on their smartphones, tablets or computers.

- Available to all ProKitchen users—no support package necessary!

## Step into your designs with ProKitchen Panorama

See your designs brought to life, months before even starting construction. With ProKitchen Panorama you can give your clients a virtual pass into the future, allowing them to see their kitchen or bath as though they are standing right in it.

Watch as your design moves with you, responding to your every turn, tilt and rotation. You'll fall in love with it's responsiveness, while your client falls in love with your design.

# Make Updates Even Easier With ProKitchen Cloud

Access hundreds of manufacturer catalogs with ProKitchen Software, ranging from major brands to custom-crafted offerings. We deliver each catalog through automatic updates via the ProKitchen Cloud. When a new catalog update is released, you'll receive a notification. Within a matter of minutes you'll be able to continue your design with an updated catalog.

## A Sampling of Supported Catalogs

### Hundreds of Cabinet & Appliance Catalogs

## A new way to design, keyboard and mouse free

You asked and we delivered. ProKitchen Stylus merges the innovative technology of design software with the tools you're most familiar with--your own hands. The result is a design experience that's

both comfortable and intuitive. It's the same design software you know and love, optimized for your tablet devices.

Let your stylus be your guide. With the innovative digit-pad technology developed by ProKitchen Software, you can create beautiful, photo-realistic designs without even touching your mouse or keyboard.

# ProKitchen **NEW** Features

## **NEW** ProKitchen Online

ProKitchen Online is a web-based software solution that gives you access to the entire scope of ProKitchen Software, without being tied down to a hardware key or your computer's download limitations. It will revolutionize the way you design by transforming any computer into your personal workspace with the click of a button.

## **NEW** ProKitchen Stylus

ProKitchen Stylus merges the innovative technology of design software with the tools you're most familiar with--your own hands. The result is a design experience that's both comfortable and intuitive. It's the same design software you know and love, optimized for your tablet.

## **NEW** ProKitchen Panorama

See your designs brought to life, months before even starting construction. With the new ProKitchen Panorama you can give your clients a virtual pass into the future, allowing them to see their kitchen or bath as though they are standing right in it.

## **NEW** 3D Quicklook Thumbnails

You're a busy designer and you have many designs and clients to handle. With 3D Quicklook Thumbnails you are able to quickly see your designs without having to open a single file, saving you time.

## **NEW** Free Shape Wall Cut

Now it's possible to make wall cuts in any shape desired, creating a modern, high-caliber design.

## **NEW** Window Shades & Blinds Wizard

The new window shades and blinds wizards allow for the tilting of shades and blinds at any angle. They can also be raised or lowered in a realistic way, and natural blind shadows create a rendering that more closely mimics a photograph.

## **NEW** Quick Reports

Create automated reports by right clicking on a design file, without launching your design software. PDF-format reports are complete with design plan, elevation, 3D rendering, bill of materials and price quote.

## **NEW** 2016 Interface

Created with new Java FX 2016 technology, our new, modern interface is complete with ribbon toolbars and menus that look great on both Mac and Windows computers. Don't worry--this new look won't replace the previous interface entirely. You'll have the option to switch between old and new.

## **NEW** Sensopia Magic Plan & eTemplate Integration

ProKitchen is now integrated with the Laser Measuring Tool and its software e-Template. Now measure your kitchens with the laser tool, then instantly import the file into ProKitchen's plan view.

## **NEW** 3D Door - Windows Frame Wizard

A new 3D Door/Window Frame Wizard provides the ability to edit every aspect of the door and window frame including its shape, finish, casement width and other parameters. Users can even change the tilt angle of the window shades and blinds to replicate sunlight shadows on the walls.

## **NEW** e-Vision System Integration

ProKitchen is now completely integrated with the e-Vision pricing system. Design in ProKitchen and export the report form directly into the e-Vision system.

## **NEW** Web Planner Integration

The newest version of ProKitchen is integrated with the Web Planner, so homeowners can now design online and save their design on the portal. The designer then receives a link to the plan automatically and can open it in ProKitchen to verify and price it. Then the designer can contact homeowners with the improved design and an accurate pricing quote.

## **NEW** Sharp No-Color Rendering w/ Super Antialiasing

No-color renderings are critical for kitchen installation. Some computer graphics cards are notorious for displaying renderings with edges that appear to be zig-zag shaped. The new ProKitchen technology provides a super antialiasing (edge-smoothing) automated feature.

## **NEW** 3D Sunlight Auto-Positioning

Manually positioning sunlight behind a window is a challenge. ProKitchen tackles this issue with the Sunlight Auto-Positioning Feature that positions light behind windows at the proper height and distance, automatically.

## **NEW** Lighting Wizard

Save time and position cabinet lights, toe-kick lights and molding lights automatically. Just specify lighting wattage and number of lights and you'll get beautifully positioned cabinets with a click of your mouse.

# ProKitchen Key Features

## Top-of-the-Line Appliance Catalogs

ProKitchen features top-of-the-line manufacturer catalogs including Bosch, KitchenAid, Sub-Zero, Wolf and Viking. This means ProKitchen includes all the main appliance manufacturer catalogs, so customers have access to thousands of appliance features

## iPhone/iPad/Android 3D 360 Viewer

Leverage the convenience of mobile technology and view, zoom and rotate your ProKitchen designs directly from an iPhone, iPad or Android. Email designs directly to clients, which they can then open with one click. Clients can view designs just as they're viewed on a computer.

## QuickBooks, Saberis and Spruce Integration

ProKitchen is integrated with hundreds of manufacturer pricing systems, as well as QuickBooks, Saberis and Spruce. Report from a ProKitchen design to any of these systems with the click of a mouse.

## Automatically Stacked Moldings

Stack moldings automatically with a drag-and-drop tool. Efficiently and easily create stacked moldings on some or all of a design's wall and tall cabinets.

## Import SketchUp 3D Shapes

The SketchUp 3D Import feature allows for access to hundreds of thousands of 3D shapes from the online library. Users have the option to import any of these shapes into ProKitchen. Those 3D shapes can also be scaled and textured and then used in designs for an added element of photorealism.

## Manufacturer Electronic Catalogs Auto-Update

ProKitchen is the only software of its kind to offer this option, which saves time and effort. Rather than contacting a manufacturer to receive a catalog update or downloading it from a website, users receive a notification when the new catalog is ready. The catalog is then updated by ProKitchen's unique auto update feature in a matter of minutes.

## Catalog Fixes and Improvements Within 24 Hours

While catalogs are proofed by two quality assurance teams before they're distributed, it can be a complicated process, which means errors may happen. ProKitchen has a system in place in which catalogs are automatically updated if mistakes are discovered by users. The catalog auto update feature means a fix is delivered within 24 hours after its initial report. The catalog problem report system is also directly available within ProKitchen.

## EZ-Link Electronic Orders

Electronic orders are vital. ProKitchen integrates with hundreds of manufacturer pricing systems. Send electronic orders from one design to multiple cabinet manufacturers.

## Solutions Library

If a user of ProKitchen wants to save a particular element or portion of a design for later use or reference it can quickly be added to their Solutions Library or the Solutions catalog. The particular part of the design can then be used in the future.

## NKBA Assistant

Utilize the ProKitchen NKBA Assistant to ensure all NKBA design regulations are met with each design.

## ProKitchenNet—Server Version

ProKitchen Net is a server addition. With ProKitchen Net multiple designers can share designs and collaborate with one another. All licenses use only one hardware key. All necessary information and designs from every store can be saved on the server for convenient access.

## Photorealistic, 3D, Fast, Reliable

With 3D technology that makes it challenging for even the most experienced of professionals to discern between the 3D image and a photograph, ProKitchen is the preferred kitchen and bath software option. High-definition technology is available with minimal hardware requirements. Every feature including colors, patterns and finishes are accurately represented and appear true to life, giving a rich customer experience.

## Multi-Quote and Combined Reports

Take advantage of different types of reports including customer reports, manufacturer reports and multi-quote reports. Multi-quote reports lets users quote varying options on the same design. A combined report allows users to combine multiple documents—such as drawings or 3D images, Bill of Materials, plan and elevation views—into a single document that can be saved as a PDF...which they can send as a more professional, single attachment to the customer

## Drawings

The ProKitchen sketch tool is one of the most well-known and revered features. It's not only incredibly easy to use, but also creates accuracy and professional layouts.

## About ProKitchen Software

ProKitchen is the only K&B professional design software that works on both PC and MAC, with only one hardware key for all your PC and MAC laptops and desktops. The core value of ProKitchen is the quality of visualization and the level of details that can be viewed by customers. ProKitchen achieves the seemingly unattainable goal of creating 3D scenes in real time with photo-realistic images. A customer can virtually touch, hold and feel cabinetry and appliances with his/her hands while "walking around" and redecorating their kitchen or bathroom.
