

ProKitchen-Oculus

Professional Kitchen & Bath Software

Compatible with 

ProKitchen-Oculus

Step into your designs and experience the difference with ProKitchen-Oculus for the Oculus Rift system.

ProKitchen-Oculus is a virtual reality software solution that gives you complete access to an entirely new way to present your custom designs. With the Oculus Rift system, the next-generation of virtual reality, you will see your custom designs like never before.

Get ready to experience immersive design.

Kitchen & bath design professionals deserve the very best tools to present their custom designs. With ProKitchen Software, you have the design tools you need to give your customers high-definition 3D renderings and 360° panoramic visuals of their space.

ProKitchen-Oculus expands on this visual experience. Using Oculus Rift, ProKitchen-Oculus gives you a brand new tool to present your custom designs: fully immersive virtual reality.

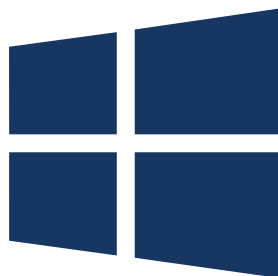

ProKitchen-Oculus Key Features

Immersive 3D virtual reality, with state of the art displays and a wide field of view

Walk through your custom design, you'll feel like you're actually there

ProKitchen-Oculus is Windows compatible

Next-generation virtual reality.

Every Oculus Rift system comes standard with headset, sensor, remote, cables and Xbox controller. To access your custom design in virtual reality, first export the design as a .rvo file in ProKitchen Software. From there, all you need to do is access ProKitchen-Oculus and then open your custom design and prepare to be amazed.

Complete immersion.

Design so real, you won't believe it's virtual reality! With state of the art displays and a wide field of view, your viewing angles and perspective seamlessly transition. Combined with a precise tracking sensor, your movement exactly affects your presence within the design.

Experiencing immersive design changes everything!

Differentiate yourself from the competition.

We know your customers expect perfection and we can make that happen. Design, price, and present your custom designs with the ultimate design software suite.

ProKitchen Software provides intuitive design, up-to-date pricing, and worry-free catalog updates. ProKitchen-Oculus provides an entirely new presentation experience. Your customers won't believe their eyes!

About Real View

Founded in 1999, Real View entered the kitchen and bath market in 2006 with a professional design software solution, ProKitchen Software. With this product, Real View brought to the market a new, 3D, stable program based on Java technology, along with a simplified user interface, supported by both Mac and Windows operating systems.

With hundreds of manufacturer and appliance catalogs supported, ProKitchen's distinctive products provide opportunities for increased sales and revenue, as well as a higher level of productivity for industry professionals.

After launching ProKitchen Online, the industry's first completely web-based professional design software solution, Real View launched ProKitchen-Oculus in January 2017, a brand new tool to present your custom designs: fully immersive virtual reality.
